# SO YOU LIKED OUR LITTLE SPINET!

Since our little ottavino spinet, the latest in our range of kits, was launched to the public only six months ago we have been overwhelmed by the response. Not only have we received hundreds of orders from all quarters of the world but we have also received many letters from delighted customers telling us how easy the kit was to assemble and how useful the spinet is as a musical instrument. The kit comes with its own attache style

carrying case which holds all the parts including historic style hardware, all the casework decoration, gilded motifs for the key and stringing well and the key cheek angels.

The jack register which forms the wrest plank comes virtually complete and ready to accept the wooden jacks with holly tongues. All in all the kit is a masterpiece of engineering and a snip at the price. Sorry you are going to have to write in for a leaflet to find out just how little it really does cost.
